

# Hydraulic Reversible Plate Compactor

## 165kg

This hydraulic reversible plate compactor provides superior compaction in both forward and reverse directions. With a 28.6 x 17.7-inch plate, it delivers 30.5kN of centrifugal force at 4810 VPM.

### Overview

#### Hydraulic Reversible Plate Compactor

This 165kg hydraulic reversible plate compactor is engineered for high-performance soil, asphalt, and granular material compaction. Featuring a robust engine and a hydraulic drive system, it offers seamless forward and reverse operation for maximum efficiency. Its adjustable handle design ensures operator comfort, making it an ideal solution for trench compaction and confined construction areas.

### Performance

#### Centrifugal Force

**30.5 kN**

Centrifugal Force

**4810 vpm**

Frequency

#### Compaction Depth

50 cm

#### Efficiency

238 m<sup>2</sup>/hr

### Technical Specifications

#### Operating Weight

165 kg

#### Travel Speed

40 cm/s

#### Plate Size

72.5 x 45 cm

### Engine Options

#### Standard Engine Options

- Honda GX270
- Loncin G270F

#### Available Optional Engines

- B&S 6.5HP
- Kohler CH260 6HP
- Kohler CH395 9.5HP
- Robin EX17 6HP
- Robin EY20 5HP

#### Power Output

6.6 kW (9.0 hp)

## Accessories

Available Accessories

Cast iron bottom plate, Trolley wheel, Rubber mat
