

Hydraulic Scissor Lift for Vehicle Maintenance

This hydraulic scissor lift is engineered for vehicle maintenance and repair tasks. It features dual platforms, a control unit, and integrated safety mechanisms.

Overview

Professional Hydraulic Scissor Lift

The U—D35 hydraulic scissor lift is a specialized piece of equipment engineered for vehicle maintenance and repair tasks. Designed for professional automotive workshops and garages, this unit features a robust dual-platform construction and integrated control systems. It is built to enhance operational efficiency while prioritizing safety during vehicle lifting procedures.

Technical Details

Model Number	U—D35
Equipment Type	Hydraulic Scissor Lift

Features

Key Features

- Dual platform configuration
- Integrated control unit
- Advanced safety mechanisms
- Designed for automotive repair

Applications

Suitable Environments	Automotive Workshop, Professional Garage, Vehicle Repair Center
