

Hydraulic Scissor Lift for Vehicle Maintenance

This hydraulic scissor lift is designed for vehicle maintenance and repair. It features dual scissor mechanisms for stable lifting and includes a safety lock system.

Overview

Professional Hydraulic Scissor Lift

The U-P35 hydraulic scissor lift is a specialized solution designed for efficient vehicle maintenance and repair. Featuring a dual scissor mechanism, this lift offers exceptional stability and safety for workshop environments. Its compact design makes it an ideal choice for garages with limited space while providing a robust 3.5-ton lifting capacity.

Performance Metrics

Lifting Capacity

3.5 tons
Max Capacity

1.8 m
Max Height

Technical Specifications

Platform Length	2.2 m
Machine Weight	1200 kg
Power Supply	220V, 380V

Features & Safety

Safety & Operation

- Safety lock system
- Remote control operation
- Adjustable platforms for various vehicle types

Compliance

European Safety Standards

Construction

Material	High-strength steel
