

Hydraulic Scissor Lift Table Cart

This hydraulic scissor lift table cart is a versatile material handling solution for industrial and commercial settings. It features a robust hydraulic system for smooth lifting and lowering, enhancing efficiency and safety.

Overview

Versatile Material Handling Solution

The Hydraulic Scissor Lift Table Cart is a robust material handling solution designed to improve efficiency and safety in industrial and commercial environments. Featuring a reliable hydraulic system, it allows for smooth, controlled lifting and lowering of heavy loads, significantly reducing physical strain on operators. With a compact, maneuverable design and a stable platform, these carts are an essential tool for transporting and positioning materials with precision.

Key Features

Key Features

Hydraulic Lift System, Foot-Operated Pump, Heavy-Duty Casters, Stable Platform, Compact Storage Design, Foldable Handle Option

Technical Specifications

Model Comparison

Model	Capacity (kg)	Min Height (mm)	Max Height (mm)	Self Weight (kg)
CYT-A150	150	215	730	50
CYT-A300	300	270	900	75
CYT-A500	500	280	900	85
CYT-A1000	1000	430	1000	135

Platform Dimensions (LxWxH)

- CYT-A150: 700x450x35 mm
- CYT-A300: 810x500x50 mm
- CYT-A500: 815x500x50 mm
- CYT-A1000: 1000x512x55 mm

Operational Metrics

Lifting Efficiency

25 cycles

Foot Presses (CYT-A150)

40 cycles

Foot Presses (CYT-A1000)

Logistics

20' Container Load

- CYT-A150: 140 units
- CYT-A300: 120 units
- CYT-A500: 120 units
- CYT-A1000: 100 units
