

Hydraulic Sheet Metal Shearing Machine

This hydraulic shearing machine is designed for cutting sheet metal with precision. Its robust frame and hydraulic system enable powerful and accurate operation in high-volume production environments.

Overview

Industrial Hydraulic Shearing Solution

The Hydraulic Sheet Metal Shearing Machine is an industrial-grade tool engineered for high-precision cutting in demanding production environments. Featuring a robust, heavy-duty frame and an advanced hydraulic system, this machine ensures consistent power and accuracy for various sheet metal applications. Equipped with an integrated back gauge, it allows for precise control over cutting lengths, optimizing workflow efficiency for high-volume manufacturing.

Technical Specifications

Cutting Capacity

16 mm

Max Thickness

6000 mm

Max Length

Machine Type

Hydraulic • Sheet Metal Shearing

Model Number

QC12Y-16X6000

Features

Key Features

- Robust heavy-duty frame construction
- High-precision hydraulic operation
- Integrated back gauge for length control
- Industrial-grade reliability
