Overview

Versatile Hydraulic Side Flail Mower

This hydraulic side flail mower is designed for efficient vegetation management in fields, orchards, and along roadsides. Featuring a robust graphite cast iron gearbox and a dynamically balanced blade axle, it ensures stable, high-speed operation with reduced noise and vibration. The unit includes hydraulic cylinders for precise angle adjustments from -60° to $+90^\circ$, allowing for effective trimming on slopes and side maintenance.

Technical Specifications

Model Comparison

Model	Cutting Width (mm)	Weight (kg)	Power Required (HP)
EFGL-125	1250	300	25-45
EFGL-135	1350	320	30-50
EFGL-150	1500	350	35-55

Performance
