

Hydraulic System Components

These components are essential for the functioning of hydraulic systems, enabling the transmission of power through fluid. They play a crucial role in maintaining the efficiency and reliability of hydraulic machinery.

Product Overview

Professional Ratchet Crimping Tool Set

This high-precision ratchet crimping tool set is engineered for durability and efficiency, utilizing special steel construction to ensure long-lasting performance. Featuring an ergonomic design, the tool reduces user effort by 50% during terminal crimping, making it ideal for repetitive tasks. The self-releasing locking mechanism and precise crimping modules guarantee consistent, high-quality results for every connection. Each unit is factory-calibrated to meet strict standards, ensuring reliability for professional electrical applications.

Technical Features

Effort Reduction

50 %
Energy Savings

Material	Special Steel
Calibration	Yes

Compatibility

Supported Model Series

- LS-30J
- LS-103
- LS-10
- LS-04WF
- LS-03B
- LS-04WFL
- LS-26TW
- LS-06WF
- LS-35WF
- LS-06WF2C
- LS-03C
- LS-03D
- LS-102
- LS-16WF
- LS-02
- LS-01

Design Highlights

Key Design Attributes

Ergonomic Handle, Self-Releasing Mechanism, Lightweight Structure, Compact Design, Factory Calibrated
