

Hydraulic Terminal Crimping Tool

This hydraulic press plier is engineered for crimping terminals with precision. Its hydraulic mechanism ensures optimal force distribution and reduces user effort.

Overview

Professional Hydraulic Crimping Solution

The HP-120C Hydraulic Press Plier is a robust tool designed for high-precision terminal crimping in demanding electrical and industrial environments. Featuring a powerful 12-ton hydraulic mechanism, this tool ensures consistent force distribution for secure, high-quality connections. Its ergonomic design and efficient stroke length minimize user fatigue while maximizing productivity on the job site.

Technical Specifications

Crimping Force

12 T

Crimping Force

Crimping Range	10-120mm ²
Crimping Type	Hexagon
Stroke Length	14 mm

Dimensions and Weight

Packaging Details

Item	Weight
Tool	4.20 kg
Case	0.81 kg

Tool Length	425 mm
Tool Weight	4.2 kg

Accessories

Included Crimping Dies

- 10
- 16
- 25
- 35
- 50
- 70
- 95
- 120

Storage

Plastic Case Included
