

Hydraulic Toe Jack

This hydraulic toe jack is used for lifting loads with very low ground clearance, ideal for machinery lifting and moving. Its lifting toe is adjustable in height, and it features a removable pump lever.

Product Overview

High-Capacity Hydraulic Toe Jacks

Designed for heavy-duty industrial applications, these hydraulic toe jacks provide a reliable solution for lifting loads with very low ground clearance. Featuring robust carbon steel construction and integrated pressure valves for overload protection, they ensure safety and durability in tight spaces. These versatile tools are available in a range of capacities to suit various machinery lifting and moving requirements.

Technical Specifications

Available Capacities

- 5 tons
- 10 tons
- 20 tons
- 30 tons
- 50 tons

Material

Carbon Steel

Safety Features

Overload protection, Pressure valves

Design Features

Key Design Elements

Low toe height • Adjustable lifting toe • Removable pump lever
