

Hydraulic Toe Jack for Heavy Lifting

This heavy-duty lifting toe jack is designed for industrial applications. It features a robust hydraulic system for reliable lifting power and a toe design that allows lifting objects with minimal ground clearance.

Product Overview

Industrial Hydraulic Toe Jack

This heavy-duty hydraulic toe jack is engineered for demanding industrial lifting applications, providing reliable power for maintenance and construction tasks. Its specialized toe design enables the lifting of machinery and equipment with minimal ground clearance. Built from high-strength steel, this tool ensures durability and long service life in rigorous environments, featuring integrated safety mechanisms such as overload protection and controlled lowering.

Technical Specifications

Lift Capacity

50 t

Minimum Capacity

100 t

Maximum Capacity

Material

High-strength steel

Safety & Features

Safety Features

Overload Protection, Controlled Lowering

Applications

Typical Applications

- Heavy machinery lifting
- Equipment maintenance
- Construction site lifting
- Mechanical moving preparation
- Industrial structure support
