

Hydraulic Toe Jack for Low Clearance Lifting

This hydraulic toe jack is designed for lifting goods and equipment in very tight spaces. It is a suitable choice when minimal clearance is available.

Product Overview

Precision Lifting for Tight Spaces

This hydraulic toe jack is engineered for heavy-duty lifting tasks where ground clearance is minimal. Constructed from high-quality carbon steel, it provides reliable performance for machinery installation, maintenance, and repair. The design features a thin, low-profile toe for easy insertion and integrated safety valves to prevent overloading during operation.

Technical Specifications

Material	Carbon Steel
Safety Features	Overload Protection, Pressure Valve, Spring-Assisted Return
Finish	Powder-coated

Available Models

Standard Capacity Options

Model Type	Capacity
Standard Toe Jack	5 Tons
Toe Jack	10 Tons
Revolving Toe Jack	20 Tons
Toe Jack	30 Tons
Hydraulic Jack	50 Tons

Available Variations

- Low-profile hydraulic toe jack
- Revolving toe jack
- Lifting jack with pressure gauge
- Bottle jack
