

Hydraulic Toe Jack for Low Clearance Lifting

This hydraulic toe jack is designed for lifting heavy loads from a low clearance point. Its robust construction ensures longevity and prevents oil leaks, ensuring reliable and safe operation.

Product Overview

Professional Hydraulic Toe Jack

This hydraulic toe jack is engineered for low-clearance lifting in heavy-duty industrial environments. Featuring a unique 360-degree revolving housing and toe assembly, it provides exceptional flexibility for maneuvering in tight spaces. Built with a focus on longevity and leak prevention, it offers a reliable solution for machinery maintenance and equipment installation.

Technical Specifications

Key Performance Metrics

30 mm

Min Toe Height

260 mm

Max Toe Height

205 mm

Max Stroke (5t model)

Available Capacities

5 Tons, 10 Tons, 25 Tons

Features

Design Advantages

- 360-degree rotating housing
- 360-degree rotating toe
- Integrated overload protection
- Leak-proof hydraulic design
- Heavy-duty construction

Safety Standards

Overload Protection • Leak Resistant
