

# Hydraulic Toe Jack with Dual Lift Points

This hydraulic toe jack is designed for lifting heavy loads with minimal ground clearance. It features dual lift points and a rugged construction for durability.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Industrial Lifting Solution

This hydraulic toe jack is engineered for heavy-duty industrial lifting, rigging, and machinery relocation. Featuring a unique dual-lift design with points on both the toe and the top, it allows for efficient operation in confined spaces. The unit is built for durability and includes an integrated overload prevention function to ensure safe and reliable performance.
