

Hydraulic Windlass with Double Cable Lifters

This hydraulic windlass is equipped with double cable lifters for efficient anchor handling. It is made with robust materials for durability and reliability in harsh marine environments.

Product Overview

Hydraulic Windlass with Double Cable Lifters

This heavy-duty hydraulic windlass is engineered for demanding marine applications, providing efficient and reliable anchor handling. Featuring dual cable lifters, it offers powerful lifting and lowering capabilities suitable for various vessel types. The system is built for durability in harsh marine environments and includes manual override functionality to ensure safety and control during emergency situations.
