

Hydraulic Wire Rope Swaging Press

This hydraulic press is designed for swaging metal ferrules onto wire ropes, creating secure terminations. It is suitable for manufacturing wire rope slings and rigging assemblies.

ADDITIONAL IMAGES

Product Overview

Professional Hydraulic Wire Rope Swaging Press

This hydraulic wire rope pressing machine represents a professional-grade solution for creating high-strength wire rope slings and rigging assemblies. Designed for accuracy and durability, the equipment utilizes advanced swaging techniques to compress metal ferrules onto wire ropes, ensuring secure terminations. It is widely utilized across demanding industrial sectors including mining, metallurgy, power generation, and port logistics.

Technical Specifications

Series Model	CLH Series
Model Capacity	CLH100

Key Advantages

Wire Rope Slings Characteristics

- High working load limit
- Perfect pressed shape for consistent results
- Excellent resistance to cauterization
- Optimized cost efficiency for wire ropes
- Ensures precise length specifications

Operational Details

Operational Features

Humanized Operation • Accurate Manufacturing Size • Robust Hydraulic System • Interchangeable Dies

Typical Applications	Mining, Metallurgy, Power Stations, Petroleum, Port Operations, Rigging
