

Hydronic Towel Radiator - Victorian Style

This hydronic towel radiator combines a traditional Victorian design with modern heating technology. Constructed from quality materials, it provides efficient and even heat distribution for warm towels.

Overview

Classic Victorian Design

This hydronic towel radiator blends traditional Victorian aesthetics with modern heating efficiency. Constructed from durable low carbon steel, it is designed to provide consistent warmth for towels while maintaining a cozy bathroom environment. Its elegant finish makes it a sophisticated addition to any classic or contemporary bathroom interior.
