

HZS25 Ready-Mixed Concrete Batching Plant

This is a stationary concrete batching plant for producing ready-mixed concrete. It features silos for material storage, a mixing unit, and a conveyor system.

Overview

HZS25 Ready-Mixed Concrete Batching Plant

The HZS25 is a compact and efficient ready-mixed concrete batching plant designed for small-to-medium scale construction projects. Engineered for reliability, this plant integrates essential components including cement storage silos, a high-performance mixing unit, and an efficient conveyor system. It provides a robust solution for construction sites or dedicated concrete production facilities requiring consistent output quality.

Technical Specifications

Model	HZS25
Plant Type	Ready-Mixed Concrete Batching Plant

Key Features

Core System Components

- Cement Storage Silos
- Mixing Unit
- Conveyor System
- Support Structures

Configuration

Stationary • Semi-Stationary
