Product Overview

Versatile and Secure Lifting Solution

This high-quality I-Beam holder is engineered for professional construction and rigging applications. Constructed from low-carbon alloy steel with a durable spray-treated surface, it offers a compact, lightweight, and reliable way to create fixed hanging points on structural steel beams. Its adjustable design ensures a secure grip, making it particularly effective for installations where overhead clearance is limited.

Technical Specifications

Material	Low carbon alloy steel
Surface Treatment	Sprayed finish (corrosion resistant)

Certifications & Compliance

Industry Standards	CE, GS, TUV Rheinland
--------------------	-----------------------

Key Features

Core Benefits

- Compact and lightweight structure
- Easy installation process
- Ideal for low-height fixed hanging beams
- Robust clamping mechanism for secure lifting

Compliance

Identification

Serial Number Included
