

IC Card Prepaid Water Meter

Smart water meter uses IC card technology for managing prepaid water usage. It features a digital display for reading and a card reader for processing payments.

Overview

Smart IC Card Water Metering Solution

This IC card water meter is designed for efficient prepaid water consumption management in both residential and commercial settings. By utilizing advanced IC card technology, it simplifies billing processes and enables precise monitoring of water usage. The device features a clear digital display and an integrated card reader, ensuring reliable performance for utility management applications.

Technical Specifications

Model Number	CS-LY-DN20
Meter Type	IC Card Prepaid Water Meter

Features

Suitable Applications

- Residential water monitoring
- Commercial water billing
- Prepaid consumption management

Key Features

Prepaid Management, IC Card Technology, Digital Display, Residential Use, Commercial Use
