

# Ice Block Production Machine

This machine is designed for efficient and reliable production of ice blocks. It features a robust refrigeration system ensuring consistent freezing temperatures and optimal ice formation.

## Product Overview

### High-Efficiency Ice Block Production

This specialized ice block machine is engineered for reliable performance in coastal and tropical climates. It features an integrated design that simplifies installation, requiring only power and water source connections to begin operation. Built with advanced refrigeration technology and robust components, it ensures stable running, easy maintenance, and consistent ice formation for demanding commercial applications.

## Technical Specifications

### Production Cycle Options

- 2 hours
- 3 hours
- 4 hours
- 8 hours
- 12 hours
- 24 hours

<b>Ice Block Weight Range</b>	2kg - 70kg
<b>Key Features</b>	Tropical Climate Optimized, Coastal Environment Ready, Energy Economizer, Integrated System, Pre-tested

## Compliance & Quality

### Certifications

Patent Protected
