Product Overview

Professional IPL Hair Removal Solution

This Ice-Cool IPL Hair Removal Device utilizes advanced xenon quartz lamp technology to provide effective, long-term hair reduction. Designed for both home and travel use, it features an integrated ice-cooling system to ensure a painless experience while maintaining skin safety. With adjustable energy levels and a compact, ergonomic design, it offers a convenient and cost-effective alternative to traditional salon treatments.

Technical Specifications

Energy Gear Levels	5 levels
Energy Density	4.5 J/cm ²
Irradiation Area	3 cm ²
Wavelength Range	510 nm
Flash Lifespan	300000 flashes
Light Interval Time	0.8 - 2s

Operating Environment

Power Supply	Input AC100-240V, Output DC12V 4A
Working Temperature	5°C - 30°C
Working Humidity	30% - 60%

Features

Performance Highlights

10 °C

Cooling Temperature

5 gear

Adjustable Levels

Key Features
