Product Overview

High-Efficiency Ice Cream Production

This fully automated production line is engineered for the high-volume manufacturing of diverse frozen desserts, including cones, bars, and sundaes. Designed with advanced technology, it integrates multiple critical stages such as filling, freezing, coating, and packaging into a seamless, continuous process. The system is constructed from high-quality stainless steel to ensure strict adherence to food safety standards while providing the durability required for industrial environments.

Technical Specifications

Freezer Capacity

300 L

Minimum Capacity

600 L

Maximum Capacity

Available Models

- HXJ-12
- HXJ-12B
- SD-1200

Material

Stainless Steel

Production Capabilities

Operational Features

- Fully automated operation
- Adjustable settings for product sizes
- Adjustable settings for product shapes
- Consistent manufacturing quality

Integrated Processes

Filling, Shaping, Freezing, Coating, Wrapping, Packaging
