

Ice Cream Shaper

This machine shapes and forms ice cream using a professional modeling plastic shell. It features microcomputer intelligent control and double protection for safe operation.

Product Overview

Professional Ice Cream Shaping Equipment

This professional-grade ice cream shaper is designed to streamline production while ensuring consistent product dimensions. Featuring an intelligent microcomputer control system and a durable, colorful plastic shell, it combines ease of operation with a modern aesthetic. The unit is built for industrial environments, prioritizing safety with integrated protection systems and ease of maintenance.

Technical Features

Control System	Yes
Panel Lighting	LED light box
Maintenance	Easy disassembly for cleaning and service

Safety & Compliance

Safety Features	Overcurrent protection, Time-out protection
-----------------	---

Design & Build

Shell Material	Professional modeling plastic
Design Style	Colorful, bright, and generous
