

# Ice Flake Production Machine

This ice flake machine provides a robust solution for producing high-quality ice flakes. It features a durable stainless steel construction, a high-capacity ice storage bin, and an advanced refrigeration system.

## Overview

### Professional Ice Flake Production

This ice flake production machine is engineered to meet the rigorous demands of supermarkets, laboratories, and healthcare facilities. It features a robust design with a high-grade 304 stainless steel cylinder, ensuring durability and hygiene for high-quality ice flake output. The system is fully automated with micro-computer control, offering reliable operation, easy maintenance, and energy-efficient performance.

## Performance

### Daily Production Capacity

**400 KGS**

Minimum

**50000 KGS**

Maximum

## Design & Construction

### Key Design Features

- Low resistance and consumption
- Noise-free operation
- Automatic argon-arc welding for precision
- Easy installation for cooling system and cylinder

Construction Material	304 Stainless Steel
-----------------------	---------------------

Ice Scraper Mechanism	Screw Scraper
-----------------------	---------------

## Operational Control

Control System	Micro-computer automated control
----------------	----------------------------------

Temperature Monitoring	Yes
------------------------	-----

Interface	Digital thermo switch
-----------	-----------------------

## Special Applications

Marine Application	Yes
--------------------	-----

Marine Cooling Method	Water cooling using seawater
-----------------------	------------------------------
