

# Ice Maker AF-15A/CF-90A

This ice maker is designed for efficient and reliable ice production. Its compact design is suitable for various kitchen environments.

## Product Overview

### High-Efficiency Ice Production

The AF-15A/CF-90A ice maker combines advanced refrigeration technology with a space-saving design, making it an ideal solution for various commercial kitchen environments. Built for durability and reliability, this unit features a microcomputer control system that ensures consistent performance and ease of maintenance. Its freon-free foam insulation and robust construction deliver crystal-clear, slow-melting ice, perfect for cooling food and beverages efficiently.

## Key Features

### Key Benefits

- Advanced refrigeration technology with long service life
- Space-saving door design for compact installation
- Microcomputer control system for reliable operation
- Freon-free foam insulation layer
- Crystal clear, slow-melting ice cubes

## Design & Build

### Maintenance

Easy to clean • Independent cleaning mode • Low failure rate

### Design Style

Graceful Arc Design, Silver Brushed Panel, Compact, Sanitary

## Technical Specifications

### Ice Quality

Hard, crystal clear, slow-melting

### Control System

Microcomputer-based detection and control
