Product Overview

High-Efficiency Ice Maker Compressor

This hermetically sealed compressor is specifically engineered for ice maker applications and light commercial refrigeration. It utilizes R134a refrigerant to deliver reliable cooling performance with a capacity of 128W. Designed for durability, this unit is built to withstand the demands of continuous operation.

Technical Specifications

Model	QD52
Refrigerant	R134a
Voltage	220-240V
Frequency	50/60Hz

Performance

Cooling Capacity

128 W

Cooling Capacity

Horsepower	1/6 HP
