

Ice Pop Mold Set

These stainless steel ice lolly molds are designed for creating homemade frozen treats. They are ideal for commercial or home use, helping to create uniform and appealing ice lollies.

Product Overview

Professional Ice Lolly Production

This ice lolly maker is designed for high-efficiency frozen treat production, making it an ideal solution for hot climates. Engineered for stability and ease of use, the unit features advanced compressor technology and built-in energy economizers. It arrives pre-tested and ready for installation, requiring only simple water and power connections to begin operation.
