

# ICR123A Battery Rapid Charger

This charger is designed for rapid charging of ICR123A batteries. It features a 3V output and an indicator to show the charging status.

## Product Overview

### Fast Charging Solution for ICR123A

This rapid charger is specifically engineered for ICR123A batteries, providing an efficient power solution for compatible electronics. Designed with performance in mind, it features a 3V output and a streamlined charging process that completes in just 2 hours. It is an ideal accessory for high-drain devices, including various LED-powered equipment.

## Technical Specifications

### Charging Time

**2 hours**

Charging Duration

### Output Voltage

3 V

## Compatibility

### Compatible Applications

LED Devices, ICR123A Batteries

## Features

### Key Features

- Rapid charging capability
- Built-in charging status indicator
- Optimized for ICR123A battery chemistry
