

IEC C13 Appliance Connector

This appliance connector is commonly used in computers, monitors, and other electronic equipment. It features a three-pin configuration and a robust, molded construction for durability and reliable power transmission.

Overview

IEC C13 Appliance Connector

The LA010B is a high-quality, three-pin appliance connector designed for reliable power transmission in electronic devices. Featuring a robust, molded construction, this connector ensures durability and safety for various applications. It is an essential component for computers, monitors, and other equipment requiring a secure and consistent power connection.

Technical Specifications

Voltage Rating	250 V
Connector Standard	IEC C13
Pin Configuration	3
Construction	Molded

Applications

Typical Applications

- Computers
- Monitors
- Electronic equipment power supply
