

IEC C14 Inlet Connector

This IEC C14 inlet connector is suitable for electric appliances. It features a standard three-prong configuration for compatibility with a wide range of equipment.

Overview

Professional Power Connectivity

This IEC C14 inlet connector is designed for reliable power supply integration across a wide range of electronic devices. Built to meet the IEC60320 standard, it ensures compatibility and safety for equipment like computers, monitors, and various industrial appliances. With multiple amperage and voltage rating options, this connector provides flexible power solutions for diverse global markets.

Technical Specifications

Rated Current

- 10
- 13
- 15
- 16

Rated Voltage

- 125
- 250

Model Number	XR-513
Standard	IEC60320

Compliance

Certifications	UL, CUL, SAA, ENEC
