

IEC61032 Figure 3 Test Probe C

This rod verifies the protection of individuals from hazardous parts. It also confirms protection against access using tools.

Product Overview

IEC61032 Figure 3 Test Probe C

The IEC61032 Figure 3 Test Probe C is a precision-engineered tool designed to verify the protection of persons against access to hazardous parts. It is specifically utilized to assess the safety of electrical equipment and enclosures by simulating human finger or tool access. This standardized probe is essential for ensuring compliance with international safety regulations regarding enclosure integrity.

Standards & Compliance

Standard Reference	IEC61032 Figure 3
