

IEEE 802.5 Shielded Computer Cable

This LAN cable is built to IBM standards, compliant with IEEE 802.5 specifications. It features braided shielding and a durable outer jacket for reliable data transmission.

Product Overview

IEEE 802.5 Shielded Computer Cable

This shielded computer cable is engineered to meet IEEE 802.5 standards, ensuring reliable data transmission for critical networking applications. Designed with robust shielding materials, the cable provides essential protection against electromagnetic interference. It utilizes high-quality construction materials, including copper conductors and durable insulation, to maintain signal integrity in demanding environments.

Technical Specifications

Material Composition

Abbreviation	Material
CU	Copper
PVC	Polyvinyl chloride
G	Braid
PE	Polyethylene
ALPR	Polyester foil coated with Aluminium on both sides
VZ	Tinned
BI	Bare
