

IGBT Inverter MMA Welder

This MMA welder uses IGBT inverter technology. It comes with an electrode holder, earth clamp, welding cable, brush hammer, protective mask and carton box.

Product Overview

Professional IGBT Inverter MMA Welder

This advanced IGBT inverter MMA welder utilizes PWM control technology and constant current output to deliver precise welding performance. Designed for efficiency and portability, the unit features a compact, lightweight build that offers energy savings of up to 30%. With built-in protective functions and versatile metal compatibility, it is an ideal solution for high-quality welding tasks across various materials.

Technical Specifications

Performance Features

- Anti-stick
- Hot start
- Arc force
- Strong compensation capability

Technology

IGBT Inverter, PWM Control, Constant Current (CC)

Safety & Protection

Auto Protection Functions

Over-current protection • Over-heating protection

Application

Compatible Metals

- Carbon steel
- Alloy steel
- Cast iron
- Stainless steel

Efficiency

Energy Efficiency

30 %
Energy Savings
