

Ignition Coil for BMW

This ignition coil is designed for BMW vehicles. It provides a reliable spark, ensuring optimal engine performance and improved fuel efficiency.

Product Overview

High-Performance Ignition Coil

This high-performance ignition coil is engineered to deliver reliable and consistent spark energy, ensuring optimal engine performance and stability. Constructed with premium materials including copper wiring and high-temperature resistant PPO, this component is designed for durability and longevity. It serves as a direct-fit replacement that meets or exceeds original equipment specifications for improved fuel efficiency and reduced emissions.

Technical Specifications

Materials	Copper Wire, PPO, High-Temperature Resistant
Warranty Duration	1 year
Warranty Coverage	50000 km

Quality Assurance

Quality Grade
OEM Equivalent
