

# Illuminated Flatbed for Metal Processing

This illuminated flatbed machine is designed for precise and even illumination during metal processing tasks. Equipped with small feet for stable placement, it features a translucent white work surface and black control levers.

## Product Overview

### Precision Illuminated Flatbed

This illuminated flatbed is engineered for high-precision metal processing tasks requiring consistent, even lighting across the work surface. Featuring a robust brown metallic frame and a translucent white work area, it provides a stable and reliable platform for detailed inspection or manual fabrication. The unit is equipped with integrated control levers for ergonomic operation and stabilizing feet to ensure a secure setup during intensive use.

## Design & Build

Frame Material	Metallic
Frame Color	Brown
Work Surface	Translucent White

## Features

Key Features	Integrated Illumination, Manual Control Levers, Stabilizing Feet, Industrial Design
