

# Illuminated Indicator Bulbs for Food Processing Machinery

These indicator bulbs are designed for use in food and beverage processing machinery. They provide visual signals for equipment status and operational feedback.

## Product Overview

### High-Visibility Indicator Solutions

These illuminated indicator bulbs are specifically engineered for use in demanding food processing environments. Designed to provide clear, color-coded visual feedback, they assist operators in monitoring machinery status effectively. With a durable metallic base and vibrant illumination, these bulbs offer reliable performance for complex beverage and cereal production lines.

## Technical Specifications

### Suitable Industries

- Food Processing
- Beverage Production
- Cereal Manufacturing

### Indicator Function

Visual Status • Machine Monitoring

### Available Colors

Blue, Green, Red

### Base Material

Metallic
