

Illuminated Tip Soldering Iron

This soldering iron is designed for electronics work and fine soldering applications. It operates on 220V-240V at 50Hz and has a power rating of 40W.

Product Overview

Professional Illuminated Soldering Iron

This multi-functional professional soldering iron is designed for precision electrical repairs and workshop tasks. Featuring a built-in light to illuminate the workspace, it offers enhanced visibility and accuracy for delicate electronics work. The ergonomic thermo-plastic handle ensures a firm, safe, and comfortable grip during extended use.
