

Immersion Heater with Plug and Receptacle

This immersion heater features a U-shaped heating element made of a metallic material encased in a black plastic housing. The plug and receptacle are black and allow easy connection and disconnection of the immersion heater for use in heating liquids.

Product Overview

Immersion Heater with Plug and Receptacle

This immersion heater is designed for efficient liquid heating applications, featuring a durable U-shaped metallic heating element. The unit comes equipped with a convenient three-prong plug and matching receptacle system, allowing for easy connection and disconnection. Its robust construction makes it a reliable solution for industrial or commercial liquid warming tasks.

Technical Specifications

Heating Element Shape	U-shaped
Construction Material	Stainless Steel, Plastic Housing

Connection Details

Connection Interface	Three-prong plug and receptacle
Housing Material	Bakelite

Identification

Model Identifier	3012011
