Product Overview

Efficient Liquid Heating Solution

This portable immersion liquid heater is engineered for the rapid heating of non-flammable liquids in small containers. Featuring a durable, corrosion-resistant coiled heating element, it ensures efficient heat transfer for both travel and home applications. The unit is equipped with a heat-resistant plastic handle to provide safe and easy handling during operation.

Technical Specifications

Design Features

- Coiled heating element design
- Protective metal guard enclosure
- Corrosion-resistant materials
- Insulated handle for safety

Material Composition

Stainless Steel, Metal Alloy, Heat-resistant Plastic

Operational Safety

Usage Requirements

Non-flammable liquids only • Portable use • Light-duty application
