## Overview

### Immersion Thermostat Overview

This immersion thermostat is a versatile component designed for precise temperature regulation in a variety of electrical appliances. It is ideal for integration into electric grills, pizza makers, deep-fryers, and roast ovens. Featuring an adjustable temperature control dial, this unit ensures consistent heating performance and reliable operation for professional kitchen equipment.

## Technical Specifications

### Rated Voltage

- 125V AC
- 250V AC

### Current Rating

**10 A**

Minimum Current

**15 A**

Maximum Current

### Temperature Range

120°C - 300°C

### Operational Life

100000 cycles

## Compliance

### Certifications

UL • VDE

## Application

### Compatible Appliances

Electric Grill, Pizza Maker, Deep-fryer, Roast Oven
