

# Impact Drill with Variable Speed Control

This impact drill is designed for a variety of drilling applications. Its variable speed control allows for precise drilling in different materials.

## Overview

### High-Performance Impact Drill

This impact drill is engineered for versatility, offering reliable power for drilling into wood, metal, and concrete. Its ergonomic design prioritizes user comfort, significantly reducing fatigue during extended operation. With variable speed control and a powerful impact function, it provides the precision and hammering action necessary for demanding drilling applications.

## Technical Specifications

### Control Features

- Variable speed control
- Auxiliary handle for stability
- Depth rod for accurate drilling

### Build Quality

Robust Motor • Ergonomic Design • Secure Chuck

### Suitable Materials

Wood, Metal, Concrete

### Impact Function

Yes
