Product Overview

Professional Eye Protection

These impact-resistant safety goggles are engineered to provide superior protection against debris, splashes, and airborne particles in industrial, laboratory, and construction settings. The flexible frame design ensures a comfortable fit for extended wear, while the integrated indirect venting system effectively minimizes fogging. Designed for reliability and compliance, these goggles are an essential component of workplace safety equipment.

Technical Standards

Certifications & Standards

CE, EN166

Product Features

Key Functional Features

- Impact-resistant lens construction
- Anti-fog technology
- Indirect ventilation system
- Flexible frame for improved ergonomics
- Adjustable elastic headband

Model Number

YY-521
