

Impact Socket Set with Carrying Case

This impact socket set includes multiple sizes for diverse applications. It is made from durable materials designed to withstand high torque and comes with a carrying case.

Product Overview

Professional Impact Socket Set

The YM-8082 impact socket set is engineered for high-torque applications in automotive repair, construction, and heavy-duty industrial environments. Constructed from durable, high-strength materials, these sockets are built to withstand the intense force of impact drivers without compromise. Each set is housed in a robust carrying case, ensuring all components remain organized and protected for easy transport between job sites.
