

In-Car Mobile Phone Charger

This compact charger is designed for in-car use. It provides a convenient power solution for charging mobile devices on the go.

Product Overview

Compact In-Car Charging Solution

This compact and portable in-car mobile phone charger provides a reliable and convenient power solution for charging mobile devices while on the move. Designed specifically for automotive environments, it ensures your devices remain powered during commutes or long road trips. With its universal USB compatibility, it offers a versatile charging option for a wide range of mobile electronics.

Technical Specifications

Output Current

1 A

Output Current

Input Voltage	12 V DC
Maximum Input Voltage	24 V DC
Output Voltage	5 V DC

Compatibility & Features

Design Highlights

- Compact form factor
- Portable design
- Optimized for in-car use

Port Type	Standard USB
