

In-Ear Headphones with Silicone Ear Tips

These in-ear headphones deliver clear audio with a frequency range of 20Hz to 20KHz. The headphones have an impedance of 32 Ohm and include soft silicone ear tips for comfortable, extended wear.

Product Overview

Professional Audio Experience

These in-ear headphones are designed for clear audio performance and a comfortable fit, making them a reliable choice for daily use. Featuring an ergonomic design with soft silicone ear tips, they provide effective noise isolation and comfort during extended wear. The lightweight construction and standard 3.5mm connector ensure broad compatibility with various audio devices.

Audio Performance

Frequency Range	20Hz - 20KHz
Impedance	32 Ohm
Sensitivity	91dB S.P.L. at 1KHz \pm 2%
Maximum Power Input	60 mw
