

In-Ground LED Spotlight for Outdoor Use

This in-ground LED spotlight is designed for outdoor use, providing efficient and long-lasting illumination. Featuring multiple high-intensity LEDs, it offers a bright and focused light output.

Overview

Professional Outdoor Illumination

This in-ground LED spotlight is engineered for demanding outdoor environments, providing efficient and long-lasting illumination for landscape, pathway, and architectural applications. Built with a durable stainless steel housing, it offers superior resistance to corrosion and harsh weather conditions. The unit features high-intensity LEDs to deliver a bright, focused light output suitable for professional-grade installations.

Physical Characteristics

Housing Material	Stainless Steel
Design Shape	Circular
Mounting	In-ground / Recessed

Technical Specifications

Diameter	180 mm
Power Rating	80 W

Features

Durability Features

Corrosion Resistant • Outdoor Rated • Robust Construction

Ideal Applications	Landscape Lighting, Pathway Illumination, Architectural Accents
