Overview

Engineered for safety across various cycling disciplines.

Professional Grade In-Mold Cycling Protection

This super light and fluid bicycle helmet is engineered for high-performance safety across multiple disciplines including road racing, mountain biking, and recreational riding. Featuring an advanced in-mold construction that fuses a durable PC shell with an impact-absorbing EPS liner, it offers superior protection without the bulk. With 24 strategically placed vents and a modern aesthetic, it provides the perfect balance of ventilation, personality, and professional-grade security for serious cyclists.
