

Incandescent/Halogen Dimmer Switch

This dimmer switch is designed for controlling incandescent and halogen lighting. It is rated for 120VAC, 60Hz, with a maximum load of 600W and suitable for single-gang or multi-gang installations.

Overview

Professional Dimmer Switch

This single-pole dimmer switch is engineered for precise lighting control, offering smooth adjustment for incandescent and halogen lighting systems. Designed for standard electrical installations, it features an intuitive slider mechanism for dimming and a dedicated rocker switch for reliable on/off control. Built for safety and compatibility, this unit is UL listed and suitable for both single-gang and multi-gang wall box configurations.
