

Individually Switched Australian Outlet Surge Protector

This surge protector power strip features four Australian standard power outlets, each individually switched for energy saving and convenience. It offers surge protection to safeguard connected devices from voltage spikes and power fluctuations.

Product Overview

Reliable Power Distribution

This individually switched surge protector is designed to provide safe and efficient power distribution for home and office environments. Featuring four Australian standard outlets, it allows users to control power consumption for each connected device independently, promoting energy savings. Built-in surge protection circuitry safeguards sensitive electronics against voltage spikes and power fluctuations, ensuring long-term reliability.

Technical Specifications
