

Indoor Amplified HDTV Antenna

This indoor amplified HDTV antenna receives digital terrestrial television broadcasts. Adjustable dipoles and a gain amplifier optimize signal reception.

Product Overview

High-Performance Indoor Reception

This indoor amplified HDTV antenna is engineered to deliver reliable digital terrestrial television broadcasts directly to your home. Featuring adjustable dipoles and a built-in gain amplifier, it optimizes signal reception across both VHF and UHF frequencies. Its compact design ensures seamless integration into any room while actively enhancing signal strength to minimize pixelation and signal loss.
